OVENABLE PACKS

FEATURES & BENEFITS

- Made from a robust and rigid material
- Can be frozen to -40°C
- Can be heated in a conventional oven up to +220°C
- Multiple size options are ideal for a variety of freshly-cooked foods
- Finished in a black material which offers an attractive appearance and a superb oven-to-table presentation
- The APET top layer provides good sealing properties and offers a premium, lustrous presentation

Nowadays, CPET is our main material for packaging ready meals. This material offers the ideal solution for oven cooking, as it is highly durable in high temperature conditions, and is also perfect for microwaving. The packaging range is available in a variety of shapes and sizes, perfect for a modern kitchen. CPET material also ensures an effective barrier against oxygen, water, carbon dioxide and nitrogen.

IDEAL FOR

- Home baking cakes
- Puddings
- Pizzas
- Lasagne
- Roasts
- Gratins
